

Thank you for your purchase of 90GR 9MM Interceptor. Handloading can result in serious personal injury. Should only be done by competent adults after complete instruction and strict compliance with instructions. Any deviation from our load data can change how the projectile fires and expands. Ballistic Machinist is not liable for any damages. If you have any questions, please contact Hamiltoncustoms@gmail.com

Ballistic Machinist Load Data

Projectile	Interceptors
Caliber	9MM
Weight	90GR
Type	Hollow Point
Powder	Titegroup
Amount	4.6GR
Case	NAS3
C.O.L.	1.13
Velocity	1335
Primer	500CCI

Use a Hollow point sitting stem/rod. Too much pressure will cause the projectile petals to compress in reloading. Use a 9mm gauge after loading to check height, fitment, and for cracks in cases. Our team is available for any questions or concerns. There are no refund on projectiles or loaded ammunition.
